Hyderabad, Telangana, India | B.Tech CSE (AI & ML), Malla Reddy University (2026, GPA: 8.0/10.0)

Technical Skills

Languages	Python (3.10–3.13), TypeScript, JavaScript (Node.js), SQL, Rust (basics)
Backend Frameworks	FastAPI, AsyncIO, RESTful API Architecture, Pydantic v2, WebSockets, Netlify Functions
Distributed Systems	Celery, Redis Task Queues, Circuit Breaker Pattern, Rate Limiting Buffers, Idempotency, Message Queues
Databases & Storage	PostgreSQL, Supabase (RLS, Stored Procedures, Realtime), SQLite, Redis Caching, AWS DynamoDB/S3
DevOps & Security	Docker, Docker Compose, Git, CI/CD, Nginx, Razorpay HMAC-SHA256, OAuth 2.0, JWT Authentication, AWS EC2, pytest

Professional Experience

Freelance Software Engineer

Aug 2025 – Present

Independent

Remote

- Architected asynchronous microservices with FastAPI and PostgreSQL, designing idempotent webhooks and background task queues.
- Implemented strict Pydantic v2 data serialization contracts, connection pooling, and Docker Compose development/production environments.

Data Science & Backend Intern

Mar 2025 – Dec 2025

Inikola Technologies

Hyderabad, India

- Developed high-throughput FastAPI REST endpoints for real-time text analysis and configured AWS EC2 and S3 infrastructure.
- Built relational database schemas and automated data preprocessing pipelines using PostgreSQL and Pydantic.

Featured Projects

Neuroviai Distributed Core Backend & Microservices

neuroviai.dev (1.2K+ Monthly Visitors)

Python, FastAPI, PostgreSQL, Supabase, Celery, Redis, Razorpay, Docker

- Engineered 6 decoupled FastAPI microservices powering commercial SaaS at neuroviai.dev with **1.2K+ organic monthly visitors**.
- Built transactional billing via Razorpay webhooks with HMAC-SHA256 signatures, idempotency, and atomic PostgreSQL stored procedures.
- Isolated background browser automation into Celery and Redis queues, preventing worker starvation during bursty traffic.

Genesis: JobPulse — Recruitment Email Intelligence & FastAPI Service

github.com/JeetInTech

Python, FastAPI, Google Gmail API, OAuth 2.0, Groq LLM API, Pydantic v2, SQLite

- Built an asynchronous ingestion service connecting to Gmail API via OAuth 2.0, reconstructing email threads across RFC 822 Message-IDs.
- Implemented Groq LLM classification pipeline detecting interview invites, assessment links, and rejections.
- Exposed FastAPI REST endpoints for real-time pipeline status queries.

Neuroviai Multi-Model LLM Routing & Gateway Engine

neuroviai.dev

Python, FastAPI, Pydantic v2, Groq, Google Gemini Pro, HuggingFace, Local Ollama

- Designed a 4-tier circuit-breaking API gateway (Gemini Pro → Groq Llama-3 → HuggingFace → Ollama) delivering 99.7% uptime.
- Buffered burst traffic under strict rate limits (12k tokens/min) with automated exponential backoff and jitter on HTTP 429 errors.
- Enforced strict Pydantic v2 JSON schema contracts on upstream model completions, preventing malformed outputs from reaching downstream services.

AIExamTool — Automated Examination & Evaluation Platform

github.com/JeetInTech

Python, AWS Lambda, DynamoDB, FAISS, OpenAI API, Flask

- Built a serverless evaluation platform on AWS Lambda + DynamoDB with role-scoped access (student/faculty/HOD).
- Implemented FAISS semantic search over course syllabi for grounded question generation and answer evaluation.

Education

Bachelor of Technology in Computer Science and Engineering (AI & ML)

Graduated May 2026

Malla Reddy University, Hyderabad, Telangana

GPA: 8.0 / 10.0
