Hyderabad, Telangana, India | B.Tech CSE (AI & ML), Malla Reddy University (2026, GPA: 8.0/10.0)

Technical Skills

Machine Learning & DL	Scikit-Learn, PyTorch, HuggingFace Transformers (T5, PEGASUS), LightGBM, Stable Diffusion, OpenCV
Big Data & MLOps	Dask, PyArrow, Optuna (Bayesian Optimization), MLflow, Pandera Data Contracts, ComfyUI, Docker
NLP & Semantic Search	Information Extraction, Tokenizers, ROUGE Metrics, ChromaDB, PostgreSQL (pgvector), LIME
Data Analytics & Viz	Pandas, NumPy, Matplotlib, Seaborn, Plotly, SciPy, Statistical Hypothesis Testing, SQL

Professional Experience

Freelance Software Engineer	Aug 2025 – Present
Independent	Remote

- Implemented end-to-end machine learning pipelines encompassing data preprocessing, Bayesian hyperparameter tuning, and model tracking.
- Trained transformer models for sequence-to-sequence NLP tasks and optimized local generative diffusion pipelines on consumer GPUs.

Data Science & Backend Intern	Mar 2025 – Dec 2025
Inikola Technologies	Hyderabad, India

- Built automated data ingestion and validation pipelines in Python, sanitizing unstructured text datasets using Pydantic and PostgreSQL.
- Developed and evaluated natural language scoring algorithms, deploying inference endpoints via FastAPI microservices on AWS EC2.

Featured Projects

AI Data Analyst & Automated Machine Learning Engine	github.com/JeetInTech
---	---

Python, Dask, PyArrow, Pandera, Optuna, Scikit-Learn, LightGBM, MLflow, LIME

- Built an out-of-core tabular AutoML pipeline capable of ingesting datasets exceeding physical RAM (5GB+) via Dask and PyArrow.
- Enforced strict schema contracts and boundary validations using Pandera, automating missing-value imputation and feature scaling.
- Executed Bayesian hyperparameter tuning over 50+ trials with Optuna, tracking metrics in MLflow and generating LIME feature explanations.

Genesis: Autonomous Multi-Board Job Application Agent	github.com/JeetInTech
---	---

Python, Groq LLM API, BeautifulSoup4, SQLite, Playwright, LaTeX pdflatex Engine

- Engineered an autonomous recruitment bot parsing unstructured job descriptions and matching candidate skills via NLP.
- Dynamically tailored LaTeX resumes matching job criteria and automated multi-step questionnaire responses across the application pipeline.

Genesis: Offline Image Workstation (Low-VRAM Diffusion Engine)	github.com/JeetInTech
--	---

Python, PySide6, ComfyUI Headless Queue, Stable Diffusion / Z-Image Turbo, Torch Optimization

- Architected a 100% local generative image workstation with CPU/GPU offloading to generate high-resolution art on a 4GB VRAM consumer GPU.
- Engineered a headless ComfyUI workflow queue with batch scheduling, packaged as a standalone Windows executable with zero cloud dependencies.

CNN Text Summarization Deep Learning Pipeline	huggingface.co/JeetinTechh
---	---

Python, PyTorch, HuggingFace Transformers (PEGASUS / T5), Datasets, Docker, Flask

- Fine-tuned sequence-to-sequence transformer models on the CNN/DailyMail dataset for abstractive text summarization.
- Implemented custom data transformation pipeline with dynamic token padding, beam search decoding, and ROUGE-1/2/L evaluations.

Education

Bachelor of Technology in Computer Science and Engineering (AI & ML)	Graduated May 2026
Malla Reddy University, Hyderabad, Telangana	GPA: 8.0 / 10.0
