Hyderabad, Telangana, India | B.Tech CSE (AI & ML), Malla Reddy University (2026, GPA: 8.0/10.0)

Technical Skills

Desktop Frameworks	PySide6 (Qt6), Rust (Tauri v2), Electron (basics), Windows API, Process Management (psutil)
Languages	Python (3.10–3.13), Rust (basics), TypeScript, JavaScript (Node.js), C/C++ (basics), PowerShell, Bash
Automation & Systems	Playwright, Headless Chrome (CDP), FFmpeg CLI, psutil, Pydub, MoviePy, Windows Task Scheduler
Packaging & Tooling	VS Code Extensibility API, PyInstaller (.exe), Tauri NSIS/MSI Bundling, Docker, Git, OpenCV, pytest

Professional Experience

Freelance Software Engineer	Aug 2025 – Present
<i>Independent</i>	Remote

- Built native desktop workstation software and automated browser orchestration systems utilizing PySide6, Tauri v2, and Playwright.
- Developed process monitoring supervisors with psutil, regex crash remediation engines, and local GPU media processing pipelines.

Data Science & Backend Intern	Mar 2025 – Dec 2025
<i>Inikola Technologies</i>	Hyderabad, India

- Managed cloud server instances on AWS EC2, configured Nginx reverse proxies, and automated deployment scripts using Bash and Python.
- Built backend service daemons and scheduled cron tasks supporting text scoring services in production.

Featured Projects

Genesis — Master Fleet Cockpit & Multi-Agent Process Supervisor	github.com/JeetInTech
<i>Python, PySide6 (Qt6), psutil, NumPy, Matplotlib, Regex Incident Remediation Engine</i>	

- Built a native desktop operations hub in PySide6 supervising 10 autonomous background agents with non-blocking psutil process tracking.
- Implemented a deterministic regex incident engine intercepting fatal runtime crashes and executing automated recovery routines.
- Vectorized a 60,000-particle animated visualization in pure NumPy at 60 FPS without blocking the GUI thread.

Mr. Memecredible — Published VS Code Extension	904 Active Installs
<i>TypeScript, VS Code API, Node.js, Webview IPC Protocol, Diagnostic Watcher</i>	

- Published developer productivity extension on Microsoft VS Code Marketplace with **904 active installs** and five-star rating.
- Subscribed to language server diagnostics via `vscode.languages.onDidChangeDiagnostics` within a strict <16ms execution budget.
- Rendered dynamic 9-stage uncanny meme meters in isolated Webview panels communicating via bi-directional postMessage IPC.

AI Local Video Editor — Autonomous Vision-Guided Studio	github.com/JeetInTech
<i>Python, Local GPU Speech Transcription, OpenCV, FFmpeg, Pydub, MoviePy</i>	

- Developed a 100% offline vision-guided video editor executing local GPU speech transcription to trim dead air and bad retakes.
- Implemented a 4-signal scoring engine (Intent: 0.35, Visual: 0.30, Safety: 0.20, Asset: 0.15) to insert contextual memes and audio stingers.
- Automated high-throughput FFmpeg video assembly with dynamic burned-in subtitle rendering and zero cloud API dependency.

Local Cortex — Native Desktop AI IDE & Workspace	github.com/JeetInTech
<i>Rust, Tauri v2, React, TypeScript, Monaco Editor, Ollama</i>	

- Engineered a native Windows desktop code editor using Tauri v2 and Rust, managing native file traversal and local vector RAG indexing.
- Built an autonomous codebase editing loop (`agent.rs`) generating multi-file diffs; packaged native NSIS and MSI Windows installers.

Education

Bachelor of Technology in Computer Science and Engineering (AI & ML)	Graduated May 2026
Malla Reddy University, Hyderabad, Telangana	GPA: 8.0 / 10.0
