Hyderabad, Telangana, India | B.Tech CSE (AI & ML), Malla Reddy University (2026, GPA: 8.0/10.0)

Technical Skills

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3/PostCSS, Python, Rust (basics)
UI Frameworks	React 18/19, Next.js 14/16 (App Router, Turbopack, SSR/SSG), Tailwind CSS (v3/v4), Motion (Framer Motion)
State & Tooling	Zustand, React Context, VS Code Extensibility API, Webview IPC, WebSockets, HTML5 Canvas, Web Audio API
Performance & Build	Vite, Webpack, Monaco Editor, Lighthouse Optimization, 60 FPS Rendering, Git, CI/CD, Netlify

Professional Experience

Founding Engineer	Sep 2026 – Present
Molars Nutrition Brand Platform	Hyderabad, India

- Built and shipped commercial brand platform using React 19, Next.js, and Tailwind CSS, maintaining 95+ Lighthouse performance scores.
- Designed interactive molecular canvas rendering components (`molecule.tsx`) with physics-based cursor repulsion and responsive layout.
- Integrated serverless Netlify Functions with transactional email confirmation and accessible client-side form validation.

Freelance Software Engineer	Aug 2025 – Present
Independent	Remote

- Developed high-performance developer extensions and responsive single-page applications with TypeScript, React, and VS Code APIs.
- Engineered fluid micro-interactions and complex multi-stage UI state machines with Framer Motion and optimized frame render budgets.

Featured Projects

Mr. Memecredible — Published VS Code Extension	904 Active Installs
--	---------------------

TypeScript, VS Code Extension API, Node.js, Webview Panels, HTML5/CSS3 Animations

- Published developer productivity extension on Microsoft VS Code Marketplace with **904 active installs** and five-star rating.
- Subscribed to language server diagnostics via `vscode.languages.onDidChangeDiagnostics` within a strict <16ms execution budget.
- Engineered bi-directional Webview `postMessage` IPC rendering dynamic 9-stage uncanny meme meter reflecting real-time syntax error count.
- Optimized extension bundle size under 250KB, ensuring negligible CPU overhead and completely unblocked main editor typing threads.

Realtime Multiverse Community Platform	github.com/JeetInTech
--	---

Next.js 16 (Turbopack), React 19, Tailwind CSS v4, Motion 13, Supabase Realtime, Web Audio API

- Built a real-time community platform using React 19 and Next.js 16 (App Router).
- Designed a 5-stage animated UI state machine (`enter` → `forge` → `arrive` → `map` → `region`) driven by Motion 13 layout transitions.
- Integrated Supabase Realtime WebSockets for sub-50ms live user presence tracking and cursor broadcasting across multiverse spaces.
- Implemented procedural sound design using native Web Audio API, generating synthetic feedback tones on interactive state changes.

Neuroviai	neuroviai.dev (1.2K+ Monthly Visitors)
-----------	--

Next.js 14 App Router, TypeScript, Tailwind CSS, Zustand, Framer Motion

- Developed the production SaaS dashboard for neuroviai.dev (**1.2K+ organic monthly visitors**) with a dark-mode design system.
- Implemented client-side optimistic UI state management using Zustand, synchronizing real-time token credit balances and billing statuses.
- Engineered a custom `ServerWarmer` routine that proactively warms sleeping serverless containers, slashing cold starts from 5.2s to <150ms.

Education

Bachelor of Technology in Computer Science and Engineering (AI & ML)	Graduated May 2026
Malla Reddy University, Hyderabad, Telangana	GPA: 8.0 / 10.0
