Hyderabad, Telangana, India

Technical Skills

Languages	TypeScript, JavaScript (ES6+), Python (3.10–3.13), SQL, HTML5, CSS3, Rust (basics)
Frontend	React 18/19, Next.js 14/16 (App Router, Turbopack), Tailwind CSS, Zustand, Framer Motion, Webview IPC
Backend & APIs	FastAPI, AsyncIO, RESTful APIs, Pydantic v2, JWT, OAuth 2.0, Webhooks, Celery, Redis, Netlify Functions, Razorpay, pytest
Databases & Cloud	PostgreSQL, Supabase (RLS, Migrations, Realtime), SQLite, Docker, Git, CI/CD, AWS (Lambda/S3)

Professional Experience

Founding Engineer Sep 2026 – Present
Molars Nutrition Brand Platform Hyderabad, India

- Architected the commercial brand web platform using Next.js, React 19, TypeScript, and Tailwind CSS, achieving a 95+ Lighthouse performance score.
- Developed serverless Netlify Functions with transactional email dispatch, client-side input validation, and Supabase synchronization.
- Built interactive molecular canvas rendering components (`molecule.tsx`) with physics-based cursor repulsion for engaging UX.

Freelance Software Engineer Aug 2025 – Present
Independent Remote

- Engineered end-to-end web applications with React/Next.js and FastAPI microservices for 3+ international startup clients.
- Designed modular REST APIs enforcing strict Pydantic v2 contracts, JWT session tokens, and Docker Compose deployment pipelines.

Data Science & Backend Intern Mar 2025 – Dec 2025
Inikola Technologies Hyderabad, India

- Developed asynchronous FastAPI endpoints for real-time text scoring modules and constructed Pydantic validation pipelines.
- Managed AWS EC2 hosting instances, S3 asset storage buckets, and Nginx reverse proxy configurations with SSL termination.

Featured Projects

Neuroviai — Multi-Service Content Automation SaaS neuroviai.dev (1.2K+ Monthly Visitors)
Next.js 14, TypeScript, FastAPI, PostgreSQL, Supabase, Celery, Redis, Razorpay, Docker

- Architected a live SaaS platform with 6 decoupled FastAPI microservices, handling authentication, billing, scheduling, and publishing.
- Built Next.js 14 App Router frontend with a custom `ServerWarmer` routine, slashing cold-start latency from 5.2s down to sub-150ms.
- Implemented atomic token billing (20× redenomination) via Razorpay HMAC-SHA256 signatures, idempotency, and PostgreSQL stored procedures.
- Decoupled browser automation and heavy workflows into Celery and Redis task queues to prevent thread starvation under concurrent traffic.

Mr. Memecredible — Published VS Code Extension [904 Active Installs](#)
TypeScript, VS Code Extension API, Node.js, Webview Panels, Diagnostic Watcher

- Published developer productivity extension on Microsoft VS Code Marketplace with **904 active installs** and five-star rating.
- Built asynchronous debounced listener (`diagnosticsWatcher.ts`) querying language server diagnostics within a strict <16ms frame budget.
- Rendered dynamic 9-stage uncanny meme meters in isolated Webview panels communicating via bi-directional `postMessage` IPC.

Genesis: Autonomous Multi-Board Job Application Agent github.com/JeetInTech
Python, Playwright, Groq LLM API, SQLite, LaTeX pdflatex Engine

- Built a Playwright + Groq LLM agent that parses listings and automates applications across 5 job portals.
- Automated dynamic LaTeX resume tailoring using Groq LLM and compiled fresh PDFs via local `pdflatex` in 1.8s.
- Managed multi-step form submissions with Playwright browser automation, crash watchdog recovery, and SQLite state tracking.

Education

Bachelor of Technology in Computer Science and Engineering (AI & ML) Graduated May 2026
Malla Reddy University, Hyderabad, Telangana **GPA: 8.0 / 10.0**
